

2025

ANNUAL REPORT

we4all

4.000.000

new roots without borders

2025 was a milestone year for We4all; 4.000.000 trees, 50.000 volunteers, and our actions across 14 countries are not just figures in a report, they are living proof that humanity possesses the reflexes to heal the wounds it has inflicted on its own home.

Looking ahead, we know that challenges will not diminish. The climate crisis does not wait, and its consequences are felt more intensely every day. Nevertheless, We4all remains here—stronger, more experienced, and more determined than ever. We are enhancing our operational capabilities, cultivating strategic partnerships that transcend borders, and creating new perspectives where others see dead ends.

For us, hope is not a passive expectation. It is a conscious and bold act. It is the decision to stand up and act, even when the odds seem slim. Every tree we plant is a shield against desertification. Every child we educate is a future leader ready to take the baton. Every community we support is a beacon of resilience. At We4all, we remain committed to harnessing the power of collective action. Because we firmly believe that meaningful and lasting change does not come from one person, but from an alliance of thousands who decided to be the change they want to see.

In 2026, we don't wait for change - we build it together. We thank you from the bottom of our hearts for being the driving force behind our every step.

YIANNIS ILIOPOULOS

CEO & Co-founder,
We4all

we4all

we4all

In a year of intense climate challenges,
our organization turned strategy into
practice, implementing a multidimensional
plan that combines reforestation, prevention,
and education.

we4all
does not limit
itself to planting;
it creates sustainable
ecosystems and active
citizens.

at a Glance

Key Achievements

RESTORATION

340.000+ new trees in 14 countries,
with surgical precision in Greece and
massive scale in India and Africa.

PREVENTION

FORTIFICATION of **500** acres of forest
land and the construction of a model fire
lookout tower in Ancient Olympia.

SOCIAL IMPACT

MOBILIZATION OF
50.000
VOLUNTEERS

EDUCATION OF
30.000

340.000 **NEW BREATHS**

HEALING THE LANDSCAPE

In 2025, We4all proved that nature's rebirth knows no borders. With more than 340.000 new roots embracing the earth, our action turned into a global green symphony.

IN GREECE

HEALING THE WOUNDS

In Greece, our strategy focused on quality and longevity. The 34.027 new breaths rooted in areas such as Evia, Attica, and Ancient Olympia are the result of persistent effort.

Restoration, not just Planting: We chose endemic and fire-resistant species, creating ecosystems capable of withstanding climate crisis challenges.

Long-term Commitment: Every tree in Greece is accompanied by our commitment to 4 years of aftercare, ensuring these efforts become green lungs for future generations.

we4all

IN THE WORLD

THE SCALE OF CHANGE

Simultaneously, We4all India and our missions in Africa acted as catalysts for global impact. With 306.294 trees in the rest of the world, we tackled desertification on a large scale.

AGROFORESTRY: We transformed barren lands into productive ecosystems.

MIYAWAKI METHOD: In Mumbai, India, this method allowed for the creation of dense «lungs» within suffocating urban centers, proving that nature can bounce back even in the toughest spots.

SHIELDING **THE INVISIBLE WORK** **THAT SAVES FORESTS**

Often, the most important work in the field is what isn't visible from afar: prevention. In 2025, we strategically invested in the fortification of our forest ecosystems. We cleared 500 acres of critical forest land, intervening where nature needed a helping hand to stay safe. This "shield" acts as a barrier against wildfires, proving that We4all operates with foresight. We don't wait for disaster to strike; we prepare the ground so that life continues to thrive.

400+ ACTIONS The Power of Collectivity

Environmental restoration is a battle that cannot be won alone. In 2025, We4all became a global connector, conducting more than 400 actions worldwide. From large-scale plantings on Greek mountainsides to targeted urban interventions in India, we united generations. These actions produced more than just greenery; they produced social cohesion, solidarity, and a deep sense of belonging.

30.000 STUDENTS “Environmental Guardians” in Action

True change roots itself in human consciousness. In 2025, We4all traveled to more than 250 school communities world-wide. We educated and inspired over 30.000 students, providing them with the tools to understand the complexity of the climate crisis. Through experiential actions and interactive programs, we cultivated a new generation of “Environmental Guardians.” For us, these 30.000 young people are the future leaders who will ensure our planet remains green.

A Global Alliance Without Borders

From the heart of the Mediterranean to the communities of Africa and Asia, we proved that the desire for a healthy planet is our common language. This global environmental alliance is not just a number; it is living proof that change has no borders. Every volunteer, every supporter, and every local partner in these 14 countries is part of a global movement that refuses to remain passive.

The environmental crisis is a challenge that knows no geographical limits, and the same applies to the actions of We4all. In 2025, we witnessed a staggering mobilization: more than 50.000 people across 14 countries joined forces with us, forming a living chain of protection for our planet. Together, we are turning local action into global impact, building a world where nature recovers everywhere

Highlights & Key Actions

ANCIENT OLYMPIA A Shield for Our History

We constructed a model fire lookout tower, enhancing the prevention and “artificial rain” mechanisms installed since 2024. We are protecting our global heritage from today’s threats.

MOUNT HYMETTUS Athens' Green Renaissance

In collaboration with ΣΠΑΥ,
we planted over 30.000 trees, creating
a resilient green lung for the capital.

WE4ALL INDIA International Impact

Through innovative agroforestry,
we are stabilizing the climate
while providing education,
medical care, and food to children
in underprivileged areas.

A GROWING ENVIRONMENTAL ALLIANCE

Every passing day, our environmental family grows stronger. 2025 was a landmark year as we reached the milestone of 100 strategic partnerships. This “Power of 100” is a living alliance of steadfast companions and new supporters. Together, we are weaving the story of a greener, fairer, and more sustainable world.
